PLANNING DEPT.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**

We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Attn: Mr Bryan Doyle. Chief Executive.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. Attn: Mr Bryan Doyle. Chief Executive.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**

We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

PLANNING DEPT.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. 1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

PLANNING DEPT.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. 1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. 7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Attn: Mr Bryan Doyle. Chief Executive.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

Attn: Mr Bryan Doyle. Chief Executive.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**

When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

Attn: Mr Bryan Doyle. Chief Executive.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. 1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

PLANNING DEPT.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

PLANNING DEPT.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

PLANNING DEPT.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

PLANNING DEPT.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

PLANNING DEPT.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**

We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

PLANNING DEPT.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022, Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.

We ask that this pointless proposal be omitted entirely from both the Wicklow County Council Development Plan 2016-2022, and the Bray Municipal District Local Area Plan 2017-2023.

Dear Sir,

Re: Wicklow County Council Development Plan 2016-2022,
Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**

Bray Municipal District Local Area Plan 2017-2023. Written Submission.

We are most upset to hear of Wicklow County Council's proposal to construct a new roadway commencing at the Kilmacanogue East roundabout, and routing Northwards to the boundary wall of Brennanstown Riding Stables and Equestrian Centre. We are even more upset by the Council's intention to pay for this unnecessary roadway by re-zoning the lower slopes of the Little Sugarloaf mountain as commercial and housing development land. We believe that this is just the thin end of the wedge, and that it is the Council's intention to complete their 2016 Kilmacanogue to Bray mountain roadway proposal by stealth over time.

1. **An unnecessary roadway.**
The roadway proposed by the Council is entirely unnecessary. It duplicates a proposal published in April 2017 by Transport Infrastructure Ireland to provide a "local service road" immediately alongside the N11 motorway at Kilmacanogue. The TII proposal is simple, sensible, and cost-effective, and it does not adversely impact the slopes of the Little Sugarloaf Mountain.

2. **An unnecessary roadway paid for by unnecessary re-zoning.**
The Council propose to pay for the proposed roadway by re-zoning the mountainside alongside it. The plan goes from bad to worse. This unnecessary roadway is now to be paid for by unnecessary re-zoning of unspoiled mountainside.

3. **A valuable local amenity will be lost.**
The lower slopes of Barchuillia Commons are an invaluable local amenity, and they are walked daily by many of the residents of Kilmacanogue village, as well as by large numbers of walking groups from further afield. The proposed roadway will isolate the village from this important open space, and will make it greatly more difficult to access, and unattractive to walk.

4. **Deer, pheasant, otters, lizard, and pine marten.**
The lower slopes to the east of Kilmacanogue village are a rich and diverse habitat which are home to successful and stable populations of deer, pheasant, otter, lizard, and pine marten. The proposed roadway will devastate this habitat. The deer will move away from the area, while the otter, lizard, and pine marten, being located immediately adjacent to the proposed site area, will not survive.

5. **Views from Kilmacanogue to the Little Sugar Loaf compromised.**
The existing views from Kilmacanogue village out over the Little Sugar Loaf mountain will be greatly compromised by the Council's poorly-thought-out proposal. We have more than our fair share of traffic and roadways in Kilmacanogue, and it seems extraordinary that Wicklow County Council would entertain the construction of additional roadways on these unspoiled uplands.

6. **Desecration of panoramic vista from the Big Sugarloaf Mountain.**
The proposed intrusion onto the slopes of the Little Sugarloaf is of such scale and crudeness, that it will detract greatly from the magnificent panoramic vista which has been enjoyed for hundreds of years by climbers of the Big Sugarloaf Mountain. The vista from the Big Sugarloaf, eastwards towards the Irish Sea, is one of the great views of our country, and must be protected at all costs!

7. **This proposal will be strenuously opposed.**
When the Council first proposed plans to encroach on the slopes of the Little Sugarloaf Mountain in 2016, there was widespread upset throughout the area, and a total of **1250** formal objections were lodged. The proposal now put forward by the Council will cause even greater damage to the Little Sugarloaf mountain, and will be strenuously resisted.
