RESOLUTIONS

RE

NATIONAL EDUCATION.

Adopted by _____

At Meeting held _____

1. That we demand such measures of reform as will secure that a majority, and not as at present, a small minority, of the Commissioners of the Board dealing with Irish education shall be in sympathy with the principles of the people of this country, and understand their educational needs.
2. That we renew our protest, endorsed by Irish public opinion, against the withdrawal of the fees for teaching Irish; that we resent the interference of the British Treasury in such matters, and regret the acquiescence shown by Irish authorities; and that we demand the restoration of a scale of fees affording adequate encouragement for the teaching of Irish, as it is not otherwise provided for out of public funds.
3. That we request the National Education Board to take effective steps for the introduction of the Bilingual Programme in all districts in which Irish is the home language, and to authorise the adoption of the Bilingual Programme in all schools.
4. That we view with indignation the doctrine of the National Board that the use of Irish in teaching should be on a basis of sufferance so far as it subserves other branches of education, and should be discarded when this purpose is achieved; and also their recent regulation empowering themselves to prohibit the teaching of Irish whenever a school fails to satisfy their requirements in other respects.
5. That the recognition of Irish as an "ordinary subject" is illusory, so long as knowledge of Irish is not placed on a level with other teaching qualifications, fully provided for in the ordinary curriculum of the Training Colleges, fully recognised as an element in the qualification of candidates for training and in the qualification and status for teachers.
6. That the present penurious treatment of National Teachers and schools is calculated to degrade education, and therefore constitutes a grave national danger. That no settlement of education can be considered satisfactory which does not include restitution of the equivalent and other grants or sums due to Irish education, unfairly appropriated by the Treasury to meet liabilities in other directions, and that does not guarantee an equivalent grant to Ireland proportioned to any charge levied on the Exchequer for the purposes of education in Great Britain.
7. That we earnestly request all those in charge of schools of every grade to ignore the restrictions and penalties imposed on them wherever their duty to the Language and History of Ireland is concerned, and to come into line with the growth of public opinion by resolutely organising their schools on a firm basis of Nationality, and we recommend parents and the public to treat as anti-Irish every school which does not manifestly place Nationality above mistaken conceptions of individual interests.

The amendment being
put as a substantive motion and
adopted unanimously.
