Resolutions at Spring Assizes, 1883.

The County Surveyor, Mr Carter Draper, submitted his report, going at length into several matters connected with the duties of his office under the following heads:—

- 1—Inconvenience of small contracts.
- 2—Extension of time of contract from 3 years to 5 in certain cases.
- 3—The saving to be effected by attention to measurement.
- 4—The evil of reckless competition by contractors.
- 5—Proposed increase of an additional assistant County Surveyor for the Barony of Rathdown.

It was ordered that the following be appointed a Committee to consider and report:—

Colonel Tighe.
Major Saunders.
Messrs. Littledale, Owen, and Acton.

The following is their report subsequently handed in:—

- No. 1—We consider, in reference to the smallness of contracts averaging less than 2 miles each, that it might be advantageous for the future to consider and enlarge contracts as the present ones gradually fall in.
- No. 2—We also consider that it would be advisable that the Presentment Sessions should have the power to extend contracts at 6d and upwards to a period of 5 years when specially recommended.
- No. 3—The saving effected by new measurements is, no doubt, satisfactory, and will, of course, affect the present contracts, but we are not of opinion that there is any probability of a permanent saving of £400 a year as anticipated.
- No. 4—We cannot recommend any course which will tend to discourage competition—it would be dangerous and lead eventually to a far greater cost if a system of selecting contractors, though tendering at higher rates than others, on the recommendation of the County Surveyor and his assistants, were allowed to creep in. The latter have ample powers to refuse to present for bad work.
- No. 5—We consider the present staff of three assistants should be sufficient, and that the assistant in charge of the Barony of Newcastle district should be able to supervise the Barony of Rathdown if he resided in a more central position. It may be remembered that the County Surveyor's salary has been increased to £500 a year; three assistants, at £80 each, and a clerk, bring up the cost of the office to £790 a year.

Signed—James Tighe, William Owen, Thomas Acton,
Robert Pratt Saunders, William Littledale,
(except in No. 5.)

Approved and ordered to be printed.

COUNTY OF WICKLOW.

SPECIFICATION

OF WORK TO BE DONE IN THE REPAIR AND MAINTENANCE

for years of perches of the

Road

between

and

IMMEDIATE REPAIRS, GENERAL DIRECTIONS AND CONDITIONS.

1—Immediately after the ensuing Assizes the surface is to be cleaned, holes and ruts filled with good material, stagnant water drained off, dangerous holes and grips fenced, the road made safe and convenient for traffic within one month, and afterwards repaired as specified from time to time, or continuously, as may be necessary, and maintained constantly in good order during the contract, clean, hard, and even, at all seasons.

The Contractor will observe that the County Surveyor will give no notice of inspection, but will expect to find the road in perfect and thorough repair at any time he or his assistant may happen to visit it.

The Grand Jury shall have the power of cancelling the contract at any Assizes should the County Surveyor report that the road has not been kept in a satisfactory manner.

The Contractor is to procure a copy of this Specification, and produce it when required by the County Surveyor or his assistant.

All the work herein specified is to be executed in a judicious, effective, and workmanlike manner in every particular necessary for the repair, constant maintenance in good order, and improvement of the road, according to the true intent and meaning of this Specification, and to the entire satisfaction of the County Surveyor.

In addition to the provisions of this Specification the Contractor is at once to carry into effect any instructions of the County Surveyor or his assistant.

WIDTH OF WORKING WAY.

2—The width of the working way of the road shall be equal to the present working way; but in no case less than 18 feet, except where walls, fences or grips interfere. The width to be extended or reduced as the County Surveyor may direct. In towns and villages the metalled surface is to extend to the paved channels, footpaths, fences or buildings, as the case may be, and over all open spaces.

SIDES.

3—The sides to be formed of sods or clay, at least two feet wide, and kept to the height of 5 inches over the watertables. These sides are to be kept neatly, edged with spade and line, and the working way defined by parallel lines, straight or regularly curved, according to the course of the road.

Where the sides are ravelled or broken, the width to be increased with stones, sods, and clay.

WEEDS, HEDGES, TREES, ETC.

4—The spaces between the margins of the working way and the boundaries to be kept clear of weeds, loose stones, brambles, and all rubbish whatsoever.

The Contractor shall also cause injurious or obstructive hedges and trees to be cut or plashed.

DRAINAGE.

5—Watertables, outlets, side, back, and catch drains to be kept, at all times, clear of mud, grass, weeds, or other obstructions to the free discharge of the water, and new ones formed where necessary.

Gullets to be cleaned out and repaired when required. This drainage and the edging above described to be thoroughly done three times a year—in February, beginning of April, and October, and at all other times as may be required.

MAINTENANCE AND IMPROVEMENT OF SURFACE.

6—The roadway and watertables shall be scraped and cleaned, so as to be at all times free from mud and dirt, especially before spreading stones.

The surface of the working way is to have a rounding from the centre to the sides of one inch per yard. Where the road has not at present this form it is to be brought to it by the application of materials, and by picking up and re-forming the surface.

The surface is to be made even by picking and levelling ribs, ruts, and inequalities.

All stones appearing over the surface of more than 2½ inches in any dimension to be picked up and the holes carefully filled with fine metalling.

Every hollow, worn or weak place, to be repaired with a sheet of metal. These sheets to be applied so as to preserve and improve the shape of the road, and to strengthen the crust. They are to be spread alternately at short intervals on each side of the road, so as to induce the traffic to beat over the entire surface.

The sheets or patches are not to be less than 2 square yards in area, to be spread evenly, closely and thick enough to prevent the old surface being seen through the stones, and of the shape of the worn or hollow parts of the road.

Before spreading the materials the old surface to be picked and loosened to the depth of half an inch (rather deeper at the edges), so that the new metalling may unite with the old.

Particular care must be taken to have the covering-flags of gullets and the arch-stones of bridges well metalled over.

In no case will drills or small patches be allowed. All loose and rolling stones to be picked off.

Nine-tenths of the quantity of stones as given below to be spread during the late Autumn, Winter, and Spring, and one-tenth in wet weather in Summer and early Autumn.

QUALITY OF MATERIALS.

7—The stones to be the hardest and toughest procurable within two miles of any part of the road, to be broken as nearly as possible to a cubical form, to pass through a two-inch ring in every direction, and to be free from clay, sand, or other extraneous matter.

QUANTITY TO BE SUPPLIED AND MODE OF DELIVERY.

8—There are to be supplied annually for the use of the road cubic yards of broken stone, or more if required, for its proper maintenance. This quantity to be laid down in in equal heaps, dressed for measurement, along the sides of the road, before 1st October in each year. The heaps to be outside the working way.

Notice in writing of the delivery of the material to be served on the assistant for the district before 25th September in each year.

N.B.—When the contract is entered on at Spring Assizes sufficient material to be at once provided for the proper repair of the road, which quantity must be entirely independent of the regular annual supply.

WASTE STUFF.

9—All road scrapings, trimmings, etc., to be used for levelling the sides, repairing fences, etc., and the surplus carted off the road; but on no account are they to be left on the working way, or thrown on the sides.

COUNTY WORKS.

10—Bridge parapets, walls, fences, etc., made by presentment, to be repaired during the first half-year, and afterwards kept in repair.

All works connected with the road to be preserved in good order, free from damage, encroachment or trespass.

FOOTPATHS, PAVED CHANNELS, GRATINGS, ETC.

11—The footpaths (if any) whether gravelled, paved, or flagged to be repaired and maintained. Gravel paths to be repaired as follows:—

If curbed with stone, all missing and defective curb-stones to be replaced with good stones, properly dressed and set. If edged with sods, any parts ravelled to be re-sodded, and the whole neatly trimmed to a fair line on inner and outer edge. Grass on sides to be neatly edged three times a year. Clean out and repair the outlets and make any new ones required. Fill up any hollows with hard material and pick up all stones that project over the surface. Path to have two coats of gravel each year—in February and October—and at such other times as may be required. Gravel to be screened free from clay, dirt, and stones over ½-inch diameter.

Surface of path to be flush with top of curb and to have a fall of 1½ inch per yard towards the road. All flagged or paved paths and channels to be repaired and kept in repair.

All gratings where broken, disturbed, sunk or removed, to be renewed and re-set with new gratings of the original form.

1—At all inspections of works, roads, &c., by the County Surveyor or his Assistants, any faults found with such works, roads, &c., are to be distinctly notified to the contractor in writing at once.

2—The County Surveyor is to give due notice to each Contractor who has applied for payment, of the time he purposes to inspect the work, road, &c., for which such application has been made, prior to Presenting Sessions. If, on such inspection, the said work or road is found to be satisfactory, certificate is to be granted, so that payment may be made in due course; but, if it be found to be unsatisfactory, and that, in consequence, certificate cannot be granted, the reason for not doing so shall be distinctly notified to the contractor in writing.

3—If, on such inspection, the work, &c., is found to be not satisfactory to enable certificate to be granted at once, but that there appears a fair chance of its being made so between the Presenting Sessions and Assizes, a “Conditional Certificate” may be granted, which, if the work or road be completed to the satisfaction of the County Surveyor before the Assizes, becomes then a regular certificate; but, if not completed as aforesaid, falls to the ground as though none were ever granted, and the Presentment shall be thrown out.

DALKEY,

Grand Jury.

9th July, 1883.

GENTLEMEN,

I have the honor to report to your Board that I have Audited the Accounts of the Secretary of the Grand Jury of the County of Wicklow, following the last Spring Assizes, and to transmit the accompanying Account duly declared and certified.

The very large balance on the debit side of the account is owing, as will be seen, to the heavy demands on the funds of the county for prosecutors, and witnesses' expenses at the Winter Assizes. The amount advanced for that purpose will be shortly recouped by the Government.

I have the honor to be,

Gentlemen,

Your obedient servant,

GEORGE W. FINLAY.

To the Local Government Board, Dublin.

Compared, F. B.,

14th July, 1883.

Read, Summer Assizes, 1883.

GEORGE HODSON, Bart., Foreman.

COUNTY OF WICKLOW.

County Surveyor's Report.

Bray, 16th July, 1883.

To the Grand Jury of the County of Wicklow, assembled at Summer Assizes, 1883.

Mr. Foreman and Gentlemen of the Grand Jury,

The applications approved of at the last Baronial Sessions may be classified as follows:—

112	for renewals of maintenance contracts for roads.
6	„ repairing and improving roads.
12	„ protection fences.
25	„ gulleys and drains.
5	„ repairs of bridges.
3	„ footpaths.
6	„ miscellaneous works.
1	„ new bridge
5	„ permissive presentments

Total 175

On all of these I am prepared to report as they come in order before you.

In all Baronies, but that of Newcastle, the change of term for maintenance contracts from 3 to 5 years has been adopted.

I have again measured the lengths of all roads, the contracts for which expire at this Assizes, and find the old measurements are wrong to the extent of 5 miles, and that the resulting saving amounts to £60 per annum.

I regret I cannot yet announce any appreciable improvement in the condition of your roads, and it is much to be deplored that but few of the contractors, whose money was respited at last assizes, have endeavoured to earn the undischarged presentments by extra work. It is consequently my duty to recommend you to return many of these sums to the credit of the county funds.

If for the future I do not observe an improvement among the defaulting contractors, I shall seek your authority to proceed against them and their sureties for the recovery of the penalties on their bonds.

The works at Ashford Bridge, Newcastle Barony, are now completed in a satisfactory manner, the cost being £174, or £26 under the amount of the presentment.

The repairs of Burgage Bridge, Barony of Lower Talbotstown, given into my charge at last assizes, are in progress. It is, as I anticipated, a work of considerable difficulty.

As the question of sanctioning the appointment of an additional assistant is to be discussed at this assizes, I beg to say that I am more convinced than ever of the necessity of this appointment, if an improvement in the existing state of things be desired. From the report of the committee of the last Grand Jury, I see that a misunderstanding has arisen on the matter, as I did not ask for an additional assistant for the Barony of Rath-

down alone, my intention being, if the appointment be sanctioned, to place each assistant in charge of two baronies, or about 300 miles of roads, and I am of opinion that a greater amount of work cannot be efficiently discharged by one man, considering the circumstances of your county. I would point out that the only method of improving the condition of your roads is to insist on the specified quantities of materials being supplied each year. This has not been hitherto done in this county, and in consequence, as I pointed out in my last report, a very large number of your roads are almost completely worn out for want of metalling.

Besides the measurement of materials and inspections of roads, it is necessary that all works in masonry should be frequently inspected during progress; the necessity of this is obvious if you glance over the list of applications in the schedule before you, where, out of 63 applications for works, 37 are for repair of county works, many of which would not be required if the work had been properly done in the first instance.

I feel confident you will give the matter fair consideration, and beg to say that I have no other object in this request than a desire that the cess-payers should have a better return for their expenditure, as the additional assistance will, in no way, relieve me of any of my present duties, which, as you are aware, involve the whole of my time.

Referring to the report of the committee of the Grand Jury of Summer Assizes, 1881, I respectfully beg to say that I cannot undertake, in every case, to carry out the first clause, nor is it necessary to do so, as most minute instructions are contained in the specifications. With regard to the second clause, it is not only impracticable but directly at variance with one of the most important clauses of the specification, which says "The contractor will observe that the County Surveyor will give no notice of inspection, but will expect that the road be in perfect and thorough repair at any time he or his assistant may happen to visit it."

Clauses 4, 5 and 6 are strictly carried out. I herewith submit copies of the specifications I have prepared for road maintenance and the various county works, and I think it would be very desirable to have that for road maintenance printed in the beginning of each abstract. May I also ask you to order that my reports at each assizes, for the sake of any information they may contain, be printed in the abstracts, as is the custom in other counties.

I have been able to reduce, to some extent, the number of undischarged queries. The abstract, after Spring Assizes, 1882, contained 418 undischarged queries, amounting to £3326, and the last abstract contains 230, amounting to £1564.

I have the honour to be, Gentlemen,

Your obedient servant,

CARTER DRAPER, M. Inst. C.E.
