WATERWORKS OVERSEER'S REPORT.

4th February, 1930.

During the month I had two of the Council's men employed cleaning Filtering Beds and washing spare sand.

On the 25th instant I by accident discovered a leak coming through a crack, in the end wall of the new clean water tank, on Chamber.

There is a good deal of water coming out of this crack, and it would need to be looked after at once, in case it gets worse, how far down the wall its leaking I cannot say until the embankment is opened up.

I would suggest that the embankment be opened up at once and get Mr Joseph O'Byrne, CoE. who was present

During the month inspected 20 premises and served one notice for defective drainage which was complied with .

I had premises at Dispensary Lane disinfected, and the bedding, etc. destroyed, and submit list of same for payment.

The usual flushing of the main-drainage and Urinals on the North and South Quay's has been carried out weekly. There are only four lengths of sewer rods in stock and we require 50 feet of new rods.
