Surveyors Report

Gentlemen
The work on the public roads has been fairly carried out during the past quarter. The state of the stone bridges, footpaths, walls &c previously reported on is naturally getting worse, and if something be not immediately done, especially to the bridge parapets and the wall on Fitzmillians Road, the works may turn out very costly, later on.

Provision should now be made for the winter repair to the unflagged paths in the district and a good supply of clean screened pit or river gravel procured and stored in depot.

I found that carting and spreading the road metal direct from the railway waggons did not work satisfactorily and I was obliged to have some of it stored in depot. I would recommend that the supply already ordered be sent on and stored in such convenient places as the Road Committee decide on.

The path on Summer Hill is unfit to walk on and should be concreted, gravel is unsuitable for this path.

Before the winter sets in I would strongly recommend that a crossing similar to that at Mr. Rooney's corner, be constructed from Mr. Francis Phillips corner to the Abbey.

wall across Abbey Hill - This is a very necessary work and if the funds of the Council will permit it should be done at once.

I enclose three tenders for mud carts. The construction of the New Sewer on Summer Hill is nearly completed - the work at the New Water Main on at the Technical School foundations is not yet commenced. I furnished the Contract-plans and specification for the balance of the new Sewerage scheme to your Town Clerk and tenders have been duly advertised for.

The waste of water according to the last diagram furnished to me by the Caretaker is not excessive being about 900 gallons per hour.

Yours faithfully
John Hausing, Town Surveyor.

(Resolution)

Proposed by Hugh R. M. Carroll, Seconded by Christopher Murray & resolved
"That the Town Surveyors Report be referred to Roads
Committee with power to have a crossing made at
