Waterworks. Report

The Caretaker of the Waterworks reported that the reservoir wanted fourteen inches of overflow. During the last month it had reduced three inches. On turning the water off at the filtering beds for forty hours he discovered that it had gone up about half an inch. In accordance with the directions of the Commissioners he tested all the mains in the town by having the Connections turned off and found the Waste to be as follows. Through 1000 gallons per hour Main at 450 gallons Church at 25 gallons the total Waste amounting to 1,625 gallons. On the through however a leak was discovered by which 400 gallons were being hourly wasted. The caretaker also alluded in his report to the fact that when testing the pipes in the main at Leffore with no connections turned off it was not wasting so much water as it was at present. After consideration it was decided to adopt report and have mains tested and valve procured

Mr. Desaix in accordance with previous notice of motion given at last meeting of the Board urged the Commissioners to take into consideration the desirability of having labourers Cottages Erected in Wicklow

Mr McC. Carroll proposed a resolution Calling upon the Guardians to take into consideration at once the desirability of Erecting the cottages which it was agreed on were necessary

The motion was seconded by Mr P J Byrne and passed

Another resolution prop. by Mr. Desaix seconded by Mr Byrne naming a Committee to consider the details of the scheme for Erecting Cottages in Wicklow was also adopted

On the motion of Mr. Desaix seconded by Mr McC. Carroll it was unanimously decided to send a letter of condolence to Mrs. Carr. Expressing the deep regret of the members of the Board on learning of the death of Mr. Carr.

The monthly meeting of the Members of the Board was held here at 12. noon. Present. Messrs McDonald V. Deane P. Doolittle W. Roche A Doolittle J. Collins Jerad. Byrne Jas Hamilton J. Flanagan T. Delahunt Jno Carroll. J. Watchorne C. Murray. & Chapman Agent

The Sub. Sanitary officer reported the Town and district to be in a healthy Condition and suggested the desirability of finding a Suitable place for the fire apparatus. when the matter was referred to the managing Committee

The Waterworks Caretaker reported as follows.

Waterworks. 1st June. 1891

Gentlemen

I furnish you with a report for the month of May. The Reservoir Wants seven inches of being full. I have a diagram to show you the waste at Midnight is 1550 gals per hour and the Consumption 2500 gals per hour in my report for last meeting I mentioned that I thought there Would be plenty of Water for the Summer but I don't if there will owing to So much water being used on the Streets. I wish to call your attention to the fact that a young boy came up and fished the pond and caught some trout. I told him a number asked me for leave to fish in the pond and I referred them to the Chairman and that I Could not allow him to fish but he persisted and came again the following day. when the trout were first put in the pond there were Countless insects of all Kinds in it they even were in the filtering beds and pipes. Now there are scarcely any and it was for this purpose of clearing the insects and so purifying the Water that the trout were placed there. If at any time the pond should become overcrowded With them I shall let you know. As people very often when they come to the pond cross the boundary wall going back. I would ask you to put up a notice Board to prevent them doing so as the top Stone of the wall are being pulled off.

After discussion it was prop by Dr. Doolittle Secd by Dr Collins and resolved that means be adopted to curtail the present Enormous waste

And on the motion of Mr. J. Carroll Secd by Dr. Murray it was resolved that a Commissioner With a friend Could fish
