Resolved that the Medical Officer of Healths Reports be referred to the Managing Committee

Wicklow 2nd March 1896

To the Chairman & Town Commissioners
Gentlemen,

I respectfully beg to report that some short time ago when the drainage of the prison was being put in order your Committee gave permission to turn the storm water drain in Colley Street into the main Sewer pending repairs as it is a large open grating I believe it will be injurious to the main drain, as the season is approaching for the use of the public seats I would ask your Board for the usual order to have them painted and repaired. The Public Lighting of the Town during the month was well attended to — The Scavenger was also attentive to his business. I would suggest to your Board that you order a practice of the Fire Hose — I made usual inspections visiting fifty houses and premises and served four notices under the Public Health act for abatement of nuisance

The Medical Officers attention I have directed to some Sanitary Subjects

Dear Sir,

In reply to your letter of the 4th inst relative to the extension of the water main to Bolarney, I regret that the Commissioners are unable to comply with the application, which they admit to be reasonable and just. Under the circumstances I hope the Commissioners will exempt the tenements in question from payment of the water rate until such time as they may be able to carry out the extension which should in my opinion have been done in the first instance

Yours faithfully

Dear Sir,

Your letter of the 6th January 1896 was duly received and communicated to the Local Government Board, with a request from the Guardians that they (the Ly Board) would Suggest the best means of carrying out the project of providing a joint Cemetery for the Rural and Urban parts of the Division of Wicklow, in reply to which request the Local Government Board Stated that in their opinion the objects in view can be obtained as follows —

(1). — "The Guardians, acting as the Burial Board, should hold "a Meeting under section 172 of the Public Health act "of 1878, and pass a resolution that a New Burial Ground "shall be provided for the District — This is necessary because "it does not appear that any Burial Ground has been "closed, The Burial Board can by the same resolution "fix the area of charge, determine to accept the conveyance "from Lord Fitzwilliam, and to apply for the Loan —

(2). — "The Town Commissioners should also hold a Special "Meeting and pass a resolution that a New Burial "Ground shall be provided for their District. This resolution "should go on to say that the New Burial Ground is to be provided "by contracting with the Guardians in pursuance of Section 175 of "the Public Health act for the use of the New Burial Ground "about to be constructed by them. —

(3). — "A Short contract should be prepared and sealed with "the Seals of the Guardians and Urban Sanitary Authority, Stating "the Exact terms of Agreement between the two bodies as to the "use of the Ground and the payments to be made by the Urban "Authority —

(4). — "When the above steps shall have been taken the Guardians "Should obtain the Loan, get the conveyance to them from "Lord Fitzwilliam, and construct the Cemetery.

Subsequent to the receipt of this communication the Guardians received a letter from Frank Brooke Esq. Stating that the field which had been promised for a Cemetery has been let to a Tenant, and that so far as that Field was concerned the matter is at an End —

The Guardians have now referred
