CHAPTER 15
SOCIAL & COMMUNITY INFRASTRUCTURE, INCLUDING OPEN SPACE

15.1 Introduction

Over the past decade the importance of providing for social and community infrastructure in towns and villages, in tandem with the more traditional forms of infrastructure, has become of utmost importance in order to create attractive, more sustainable areas in which to live. This increased emphasis on the provision of social and community infrastructure has been emphasised by the DoEHLG through the production of guidance documents relating to childcare, school provision and urban design, which have in turn been further expanded upon, through publications and work carried out by the Planning and Community & Enterprise Sections of Wicklow County Council.

Strategy

To promote and facilitate the development of “Sustainable Communities” through land use planning, by providing for land uses capable of accommodating Community, Leisure, Recreational and Cultural Facilities; accessible to and meeting the needs of all individuals and local community groups, in tandem with the delivery of residential and physical infrastructure in order to create a quality built environment in which to live.

15.2 Community Development

The term “community development” refers to a complex and broad range of actions and measures involving a wide range of practitioners and bodies with the common aim of improving various aspects of local communities. There are however two key strands to the development of ‘sustainable communities’:-

- Facilitating communities in developing the skills, capacities and projects needed to enable them to have a greater say in the management of their own futures;
- Facilitating access to the goods, services and powers structures within society for all, and particularly for those that are marginalised and powerless (‘social inclusion’).

Land use planning plays the following roles in delivering these aims:-

1. Facilitating the delivery of community projects, through
   - the reservation of land for community uses in County and local development plans;
   - managing the expansion of residential development commensurate with the community facilities available;
   - requiring the delivery of new community facilities as part of development proposals;
   - cooperating with other services providers in the delivery of new facilities;

2. Facilitating improved physical access to goods and services through
   - directing new facilities to suitable locations and in particular, to the locations where people live or locations that are easily accessible by public transport, cycle or foot;
   - requiring all new facilities to be accessible and useable by those with special needs, including mobility or other impairments;

3. Facilitating an overall improvement in the quality of the built environment, which contributes substantially to our perception of places and communities.
Community Development Objectives

CD1 Through the planning process, Wicklow County Council will consult and engage with prescribed bodies, local community interest groups and individuals prior to the preparation of plans for towns and villages in accordance with the provisions of the Planning and Development Acts and any subsequent review during the lifetime of the plan.

CD2 In the preparation of plans for towns and villages, the Council will endeavour, through proper land use zoning and transportation planning, phasing and the setting out of high standards of design in both streets and buildings, facilitate community development and promote socially inclusive communities throughout the County.

CD3 The Council will promote and facilitate the delivery of community facilities in accordance with the Hierarchy Model of community facilities prepared under Strand 3 of the Development Levy Scheme (under Section 48 of the Planning and Development Acts) (as set out in the appendix to this chapter).

CD4 Wicklow County Council recognises the needs of those with disabilities throughout the County and acknowledges their right to lead as enriching, fulfilling and independent lives as possible. In support of this, all policies, objectives and development standards of this plan have been proofed to ensure that not only do they not impede on the lives of people with disabilities but that they proactively assist and enable them.

CD5 Unless otherwise specified by in the Planning Authority, new significant residential developments\(^1\) will be required to carry out a social infrastructure audit, to determine if social and community facilities in the area are sufficient to provide for the needs of the future residents. Where deficiencies are identified, proposals will be required to either rectify the deficiency, or suitably restrict or phase the development in accordance with the capacity of existing or planned services.

15.3 Social infrastructure

The provision of ‘social infrastructure’, in the form of buildings, facilities, clubs and the means of accessing and using services, is necessary for the development of sustainable communities. The purpose of such infrastructure is both to provide a service and also to promote community cohesion and community identity and in doing so combat social isolation and alienation. A wide variety of facilities are required in order to have a functioning and developing society, and one’s use of facilities will dependent on a range of factors including age, family structure and physical ability. Essentially there are four broad categories of facilities:-

1. Those providing education and development, including primary, secondary and third level schools and colleges and vocational or training centres (Montessoris and pre-schools are addressed under ‘childcare’);
2. Those providing physical and mental care and development, such as health services, nursing homes, childcare / pre-schools, facilities for those with special needs etc;
3. Leisure and recreational facilities including community / youth centres, indoor halls, dance / gymnastic studios, playing pitches, courts etc;
4. Cultural facilities, such as arts centres, theatres, libraries and places of public worship and burial grounds etc.

---

\(^1\) This is determined to be any application that would increase the housing stock in a settlement by more than 10%
15.3.1 Education & Development

Education and training have a key role to play in all three dimensions of ‘sustainable development’ - environmental, economic and social. It is widely recognised as a key component of a competitive economy and a vibrant society. The Council seeks to create an environment in which everyone can develop to their full potential to enable them to participate in and contribute to all aspects of social, economic and cultural life. The Council will endeavour to facilitate the provision of the best possible educational facilities at pre-school, primary, secondary and adult levels, on suitable zoned lands, in conjunction with the Department of Education & Science, the Department of Enterprise, Trade & Employment and the Department of Health & Children.

Education objectives

ED1 To facilitate the provision of schools by zoning suitable lands in Local Area Plans capable of meeting the demands of the projected populations. Prior to the identification of lands for primary and secondary school provision the Council shall consult with the Forward Planning and Site Acquisition and Management sections of the Department of Education.

ED2 Where lands are zoned for educational use, to promote and facilitate the development of facilities that provide for linkages between schools types. For example, particular encouragement will be given to primary and secondary school campuses, the linking of pre-school services with primary schools and the linking of secondary schools with vocational training facilities.

ED3 Where lands are zoned for employment use, to promote and facilitate the development of employment training facilities (privately and/or publicly funded).

ED4 Where practicable, education, community, recreational and open space facilities shall be clustered. However schools shall continue to make provision for their own recreational facilities as appropriate.

ED5 To facilitate and promote the development of third level facilities within the County, in particular the further development of the Wicklow County Campus at Clermont, Rathnew including the development of full time tertiary vocational and academic courses on campus.

ED6 To promote the provision of dedicated facilities for adult and community education in recognition of the growing demand for life-long learning opportunities and the perceived shortage of such facilities at present.

ED7 To promote the use of education facilities after school hours / weekends for other community and non-school purposes, where possible.

ED8 To promote the continuation and expansion of rural/village primary schools.

15.3.2 Health, Care & Development

15.3.2.1 Health

A number of public, voluntary and private agencies are responsible for the provision of healthcare facilities within the County, with the Health Services Executive being the primary agency responsible for delivering health and personal social services.

Health Objectives

HC1 To facilitate the development of healthcare uses at suitable locations, in liaison with the appropriate health authorities. Health facilities will be considered at all locations and in all zones, provided that:
The location is readily accessible to those availing of the service, with a particular presumption for facilities in towns and villages and in areas of significant residential development. Isolated rural locations will not generally be considered except where it can be shown that the nature of the facility is such that demands such a location;

The location is generally accessible by means other private car, in particular by public transport services, or by walking / cycling

The location is accessible to those with disabilities.

HC2 To support the establishment of new or expansion of existing hospitals, nursing homes, centres of medical excellence, hospices, respite care facilities or facilities for those with long term illness.

HC3 To allow for the change of use of all or part of an existing dwelling in a residential zone to health care usage, subject to normal planning considerations, paying particular regard to car parking availability, impacts on traffic flow and obstruction and impacts on residential amenities.

15.3.2.2 Residential & Day Care

Having regard to the ‘ageing’ of the Irish population, in addition to health care facilities, there is a growing need for the provision of specific residential and day care facilities for the elderly. The Council recognises that the provision of residential / day care and nursing homes is an essential community requirement and that this area is underdeveloped in this County.

A number of agencies are active in County Wicklow providing residential and day care services to those with physical or intellectual disabilities. The Council recognises the special services providers by these bodies and aims to facilitate them wherever possible.

As those in residential or day care facilities will have different needs and abilities depending on health and ability, it is important to ensure that such facilities are well integrated into society and afford residents full access to goods and services outside of the facility.

Residential and day care facilities can take many forms, ranging from day time activities / services to care / nursing homes, to assisted living units to independent (but supervised) living units and it is not therefore always possible to craft policies that will address all development types. All applications for development will be considered on their merits with particular regard to their location and the type of service being provided.

Residential & Day Care Objectives

NH1 To encourage the development and improvement of new and existing residential and day care facilities throughout the County.

NH2 Residential and day care facilities shall in general be required to locate in existing towns or villages and shall be located close to shops and other community facilities required by the occupants and shall be easily accessible to visitors, staff and servicing traffic.

NH3 ‘Retirement villages’, made up of a number of independent housing units, with limited / no on site care facilities will be required to locate on residentially zoned land in settlements (or where no local area plan exists, within the defined boundary of the settlement).

NH4 Edge of centre locations (i.e. locations on unzoned lands at the edge or outside of settlements) will only be considered for residential or day care facilities where:

- There are good vehicle and pedestrian linkages available to town facilities;
- The site is within the built ‘envelope’ of the settlement and would not comprise of an isolated, stand alone development;
- The design and scale of the facility is reflective of the semi rural location.
To provide for new or extended residential care facilities for the elderly at the following locations:

a) Ballinahinch Lower, Newtownmountkennedy (8.14ha, as shown on Map 15.01)
b) Blainroe / Kilpoole Lower (2.47ha, as shown on Map 15.02)
c) Coolgarrow, Woodenbridge (1.47ha, as shown on Map 15.03)
d) Killickabawn, Kilpedder (6ha, as shown on Map 15.04)

15.3.2.3 Childcare and preschool

The provision of childcare and preschool facilities is recognised by Wicklow County Council as a key piece of social infrastructure enabling people to play a more active role in society, particularly in accessing employment and education. Childcare services range from childminding a small number of children in a private home, to pre-schools and crèches. A large number of childcare facilities now provide a full range of services from caring for newborns to pre-school and Montessori type education. The growth in population and housing in Wicklow over the last number of years has not been matched with the necessary growth in childcare services, notwithstanding the implementation of the DoEHLG guidelines, which require the provision of 20 childcare places for every new 75 housing units granted permission.

There is also a growing demand for rural childcare services, as the proportion of the County’s population living in rural areas continues to grow.

Childcare Objectives

CC1 To facilitate the provision of childcare in a manner which is compatible with land-use and transportation policies and adheres to the principles of sustainable development.

CC2 To promote and encourage the provision of a network of childcare facilities that reflects the distribution of the residential population in the County, in order to minimise travel distance and maximise opportunities for disadvantaged communities.

CC3 To require the provision of childcare facilities in all residential developments comprising 75 houses or more (including local authority and social housing schemes). In accordance with Department of Environment, Heritage & Local Government guidelines, childcare places shall be provided at a ratio of 20 places per 75 residential units, having regard to cumulative effects of permitted development, (unless it can be demonstrated that having regard to the existing geographic distribution of childcare facilities and the emerging demographic profile of the area that this level of childcare facilities is not required). Without substantial cause, it is the policy of the Council not to allow a change of use of these premises within five years.

CC4 To take account of relevant guidelines and identify suitable locations for childcare facilities in future reviews of Local Area Plans and future Action Area Plans, where this is feasible.

CC5 The Council will give positive consideration to childcare facilities in rural areas subject to the following criteria:

- The facility comprises either the conversion of part of an existing rural dwelling or an existing out-building associated with such a dwelling;
- The facility is operated by the resident of the dwelling;
- Existing infrastructural services (water supply, wastewater disposal, entrance and car parking arrangements) are adequate or can be upgraded to a standard suitable to meet the needs of the facility;
- The scale of the facility (i.e. the number of children attending) shall be modest and appropriate to the rural location and will be required to be justified on the basis of:
  - the catchment of the facility;
  - the proximity to other childcare facilities;
  - the proximity to an existing towns or village, where land is zoned or available for childcare development.
15.3.3 Leisure & recreation

The types of leisure and recreational facilities provided/required vary greatly from area to area and from person to person ranging from active to passive activities. The Council recognises this fact and aims to provide for adequate leisure and recreational facilities throughout the County, which are capable of meeting the requirements of the resident population.

15.3.3.1 Children’s Play

In addition to childcare facilities, pre-schools and after school services (dealt with previously) children also require opportunities to socialise, play and exercise. Wicklow County Council through the Office of Community & Enterprise has responded to this need by preparing a Play Policy for County Wicklow. The purpose of the Play Policy is to change the culture of thinking on play and provide more opportunities for children to play. This play policy reflects the importance that Wicklow County Council places on the value of play in childhood and the importance of children in our society. It also recognises that changes in today’s society are having an impact on children’s opportunities to play. The policy makes a clear commitment to play as a right and to ensuring that children and their needs are considered when it comes to policy making and that provision is made to meet their needs.

Play is not just about the provision of facilities. It is also about creating the conditions that facilitate children’s play, not only in playgrounds but in the wider environment. In addition, facilities for children’s play do not always have to consist solely of the traditional playground equipment – they can be an interesting and natural environment with features such as a sensory garden, bushes, an interestingly placed tree trunk. Research has shown that for children, a playground is their base for play, somewhere from which to safely explore their neighbourhood. This places an emphasis on safe, enjoyable and attractive play environments. However, neighbourhood spaces, estates, parks, streets, libraries, community centres and gardens are as important as dedicated playgrounds.

Objectives

CP1 To facilitate opportunities for play and support the implementation of the Wicklow County Council Play Policy and its objectives, including the collection of development levies.

CP2 In all new residential development in excess of 75 units, the developer shall provide, in the residential public open space area, a dedicated children’s play zone, of a type and with such features to be determined following consultation with Community & Enterprise Section of Wicklow County Council.

CP3 All new estates, streets, open spaces/parks and community facilities shall be designed with the needs and safety of children as a priority.

CP4 Subject to safety considerations, natural features (trees, streams etc) shall be retained in new developments.

15.3.3.2 Teenagers & young adults

Many teenagers and young adults feel disenfranchised in society, particularly with regard to the lack of facilities provided specifically to meet their needs. These youths are too old for playgrounds and while many are active in sports clubs, there is still a lack of facilities for socialising and relaxation. Depending on the age, there are a number of facilities that are considered attractive to teenagers and young adults including Mixed Use Games Areas (MUGAs), which would typically provide a hard surfaced area allowing for basketball and other hard court sports, skate parks, youth clubs and Internet cafes.

Objectives

TY1 Through the Local Area Plan and Action Area Plan process, the Council will identify the needs of teenagers and young adults and appropriately zone or designate land for new facilities.
TY2 In accordance with Objective CD5, where a deficiency in facilities for teenagers / young adults is identified in an area, the developer of any significant new residential estate shall submit proposals to address the deficiency.

TY3 All new neighbourhood parks or active open space zones shall include a MUGA of a size and nature to be following consultation with Community & Enterprise Section of Wicklow County Council.

TY4 New community buildings / facilities shall be designed to facilitate the operation of youth clubs and youth services (see Objective CC2 to follow).

15.3.3.3 Community centres

Community centres provide an important function for all groups in society, by providing for an indoor space for active recreation and for meetings / club use. While many ‘outdoor’ sports clubs also have indoor spaces, these many not be suitable for non-sport activates such as support group meetings, bridge clubs, mother-and-baby groups etc. In Ireland there is a particular dependence on the use of function rooms in hotels and public houses for club or meeting use, which are similarly not often ideal in design or size.

Objectives

CC1 In accordance with Objective CD5, where a deficiency in indoor community space is identified in an area, the developer of any significant new residential estate shall submit proposals to address the deficiency.

CC2 New community buildings / facilities shall be designed to facilitate a wide range of uses including active uses (e.g. basketball, badminton, gymnastics / dance, martial arts etc) and meeting / club use.

15.3.3.4 Sport

In addition to the Play Policy, Wicklow County Council has also developed a Sports & Recreation Policy. This policy recognises the importance that sport and recreation contributes to the quality of life of individuals, communities and the County as a whole. It will be the overarching policy document that provides a strategic approach, which includes the identification of deficiencies, needs and priorities and the inclusion of underpinning principles of social inclusion and sustainable development framework. Its implementation will be carried out in partnership and co-operation, to enable all residents of the County to have equal access to sport and recreation facilities and opportunities for participating in the sport or recreation of their choice.

Objectives

SR1 To contribute to the improvement of the health and well being of the inhabitants of County Wicklow and to facilitate participation in sport and recreation.

SR2 To be guided by the Sports & Recreation Policy in the provision and expansion of sport and recreation opportunities in County Wicklow for the next ten years, in particular through the Local Area Plan and Action Area Plan process. In addition the policy will inform the development levy scheme for community facilities, in particular the provision of sport and recreation facilities.

SR3 Facilities for sports shall normally be located close to towns or villages, on designated Active Open Space land. All efforts will be required to be made to locate new sports facilities close to existing community facilities, schools or areas of dense residential development. The Council may consider providing sites for these purposes or may be prepared to make financial or other assistance available, subject to reasonable access being made available to the public and to reasonable safeguards for the continued use of the land as open space.
The redevelopment for alternative uses of open space and recreational lands whether owned by private recreational clubs or publicly owned, will normally be resisted by the Council unless suitable alternative recreational facilities can be provided in a convenient location.

The development of new sports or active open space zones shall be accompanied by appropriate infrastructure including car parking and changing rooms.

To provide for GAA sports complex and mixed use development of lands at Tinode, Manor Kilbride, (6.86ha, as shown on Map 15.05).

15.3.4 Culture

Cultural facilities are places for the creation, production and dissemination of culture and include buildings and cultural sites.

15.3.4.1 Arts

The Arts create opportunities for the cultural development of all the community. In addition it offers all the community, young, old and minority groups, a creative outlet and an alternative to sport and active recreation.

In order to provide for the existing and future development of the Arts in County Wicklow the Council has developed the Wicklow County Arts Plan. A number of objectives and actions have been identified in the Arts Development Plan and these will be reflected in increased resources and support to the arts community from Wicklow Local Authorities, Statutory Agencies, Local Development Agencies, the private sector and the wider community.

15.3.4.2 Libraries

The purpose of the public library is to support the community’s needs for education, information, recreation, arts and culture. The public library is a publicly funded resource providing a cost-effective means to equity of access. With thirteen branches throughout County Wicklow each providing free internet access, the Council regards the library service as an important resource in promoting its policy on social inclusion and in providing public access to the Information Society. The library is a means to ensure support for literacy, independent learning and distance education.

15.3.4.3 Places of worship and burial

In many communities, churches, burial grounds and other places of worship form a focal point for the local population and often provide not only a religious service, but also meeting places and other cultural services.

Objectives

CA1 To maximise the opportunities for the Arts and support the implementation of the Wicklow County Arts Plan and its policies.

CA2 To encourage and support the creation and display of works of art in public areas, including appropriate locations within the streetscape, provided no unacceptable environmental, amenity, traffic or other problems are created.

CA3 To support the implementation of the Wicklow Library Development Plan.

CA4 To facilitate the development of new, improved or expanded places of worship and burial grounds at appropriate locations in the County, where the demand for the facility has been demonstrated.
15.4 Open Space

The delivery of new sports and other outdoor community facilities and spaces is dependent on adequate ‘open space’ being reserved and developed. ‘Open space’ can take many forms but for the purpose of this plan is generally considered to be space designated for such use in Local Area Plan or Action Area Plan or land reserved or set out for active and passive uses and visual amenity purposes as part of new development of housing or commercial development. Open space can take a number of forms, with some use types overlapping:-

1. Private open space – open space owned and / or dedicated to use of single individuals or small groups for example private gardens, terraces, yards, balconies or shared private spaces in apartment developments;

2. Residential open space – space generally provided in housing developments, that is public in the sense that there are no barriers to access, but its function is to provide for passive and active use by the residents of that development;

3. Public open space – space that is open to general public use, which can be further divided into active and passive public open space:
   - Passive POS – squares and civic spaces, picnic areas, walkways, parks etc
   - Active POS – playing fields, hard surfaced courts, MUGAs

4. An emerging new form of open space is the use of land for allotments. Allotment gardens allow a number of people to cultivate their own vegetables in individual plots/land parcels on lands owned by another private individual or body. The individual size of a plot/parcel ranges between 200-400sqm and often the plots include a shed for tools and shelter. The individual gardeners are usually organised in an allotment association which leases the land from the owner who may be a public, private or ecclesiastical entity, provided that it is only used for gardening (i.e. growing vegetables, fruits and flowers), but not for residential purposes.

Open space objectives

OS1 Through the Local Area Plan and Action Area Plan process to designate suitable active and passive open space in all settlements, commensurate with its needs and existing facilities, in accordance with the provisions of the Wicklow County Council Play, Sport & Recreation and Active Open Space policies.

OS2 To require passive and active open space to be provided in tandem with new residential development (in accordance with the standards set out in Section 15.5 of this chapter).

OS3 Prohibit non-community uses on areas of lands permitted or designated as public open space in existing residential developments.

OS4 To facilitate the development of allotments of an appropriate scale on lands which meet the following criteria:-

- Lands situated within or immediately adjacent to the edge of towns/villages;
- Lands that are easily accessible to the residents of a particular town or village;
- Where an adequate water supply can be provided;
- Where adequate parking facilities can be provided.

OS5 All passive and active open spaces shall be provided with environmentally friendly lighting in order to ensure their safe usage after day light hours, in compliance with Article 6 (3) and 6 (4) of the EU Habitats Directive 1992, ‘Appropriate Assessment of plans and projects in Ireland – Guidance for Planning Authorities’ (DoEHLG 2009) and the objectives set out in Chapter 15 of this plan.
15.5 Development standards

The standards set out in this section relate particularly to new developments; however, proposals for the redevelopment / enhancement of existing community / social facilities and open spaces, shall be assessed against the same criteria.

15.5.1 Community Facilities

In preparing a Social Impact Assessment in accordance with Objective CD5, at a minimum the following services / facilities shall be evaluated:

**Education**
- Evaluation of number of new students likely to be generated by the proposed development having regard to Departmnet of Education estimates
- Identification of existing primary and secondary facilities in the area, distance from the application site, road network / public transport facilities between the locations
- Details of school capacities, existing number of students and capacity for new intake

**Childcare / preschools**
- Evaluation of number of new pre-school age (0-5) children likely to be generated by the proposed development
- Identification of existing childcare and pre-school facilities in the area, distance from the application site, road network / public transport facilities between the locations
- Details of capacities of existing facilities, existing number of children enrolled and capacity for new intake

**Open space, play & recreation facilities**
- Identification of existing public open spaces and sports clubs in the area, distance from the application site, road network / public transport facilities between the locations
- Evaluation of suitability of these facilities to meet the needs of the projected population of the development, having regard to the following proportions:

  - 2.4ha of active open space per 1,000 population, divided into:
    - 1.6ha outdoor play space
    - 0.6ha casual play spaces
    - 0.2ha equipped play space

Where deficiencies in existing service / facilities are identified, proposals will be required to
- remedy this shortfall through the provision of the necessary facility
- restrict or phase the roll out of housing to coordinate with the delivery of new facilities

New community facilities shall be conveniently located and accessible by both residents of the development and others that have reason to use the facility. They should be well integrated with pedestrian and cycle routes and where they serve a wider community, located on or close to a quality public transport route.

Community facilities must be accessible to all members of society, including those with disabilities.

Social Impact Assessments shall have regard to likely future development in an area, given concurrent planning applications or the zoning provisions of the applicable local plan.

---

2 This is an indicative guide as to the type of information to be provided in a Social Impact Assessment (SIA). SIA’s submitted should be tailored to include the varying needs of different social / demographic groups. For example, other facilities such as healthcare, adult education and training or care services may be required if groups needing such services are dominant in an area or a development is being proposed to cater for specific demographic or social groups.
15.5.2 Childcare

- The location and design of new childcare facilities shall generally in accordance with the guidance set out the ‘Childcare Facilities: Guidelines for Planning Authorities’ (DoEHLG) and the ‘Child Care (Pre-School Services) Regulations 1996 & 1997’ and any other relevant statutory guidelines which may issue during the life of this Plan.

- As a general rule 20 childcare spaces shall be provided for every 75 dwelling units. A childcare facility within a residential development shall be sited at or near the entrance/exit to the proposed development so as to allow for ease of access, drop off / pick up points.

- Where a large development (or a development in conjunction with other developments in an Action Plan area) comprises more than 75 units, a single large childcare facility capable of serving all proposed units (and future units) may be permissible, subject to a ceiling of 100 places (full and part time).

- The internal layout and design of proposed childcare facilities should allow, where possible, for the dual usage of the proposed facility e.g. night time community uses.

- All applications for a childcare facility shall be accompanied by the following information in addition to those set out in the policies set out for childcare developments:
  - The need for the proposed development;
  - The nature of the facility e.g. full day care, sessional care, after school care;
  - Number and ages of children to be catered for;
  - Compliance with standards for parking, traffic impacts and turning areas;
  - Proximity to public transport/areas of employment;
  - Hours of operation;
  - Open space provision and measures for management of same;
  - Impact on residential amenity.

- Childcare facilities will be required to be provided in large-scale employment zones developments. Any application for employment development with in excess of 100 employees shall include a childcare facility unless it can be shown, with regard to the demographic of the workforce or the availability of existing facilities in the immediate area that no such service is necessary.

15.5.3 Education

Primary & secondary schools

While the location, layout and design of new public primary and secondary schools shall generally be determined by the Department of Education, new schools shall be required to comply with the following criteria;

- Sites shall be well serviced by road infrastructure and in particular, shall be on or adjacent to a road network capable of accommodating existing or future public transport facilities;
- Complete foot and cycleways shall be available to the site from the residential areas that are located in the school catchment;
- Pedestrian crossings of the existing / new road network serving the site shall be provided as may be required;
- Adequate car, bicycle and bus parking shall be provided on site, including convenient short term set down area;
- Building design shall meet the highest standard possible with regard to architectural quality, visual integration with the area and minimisation of impacts on adjoining properties or residences;
- The layout and design of the school shall facilitate possible out of school hours use by other bodies / the community.
Temporary school structures

- While certain exemptions apply for temporary classrooms at school sites, where the exemptions are not applicable, positive consideration will be given for temporary structure subject to the following controls:
  - permission shall be granted on a temporary basis for a period of a maximum of 5 years
  - the development of temporary classroom developments shall not impede traffic movements and circulation within the school premises or significantly reduce open space
  - the structures shall be of a high design quality and shall be painted or coloured to integrate with any existing school structure

15.5.4 Nursing home developments

- Nursing home developments and facilities for the elderly shall be located close to local amenities and where adequate pedestrian infrastructure has been or is capable of being provided;
- Individual / independent housing units proposed as part of a nursing home / retirement village shall generally be held in single ownership with the overall site, with lease agreements to the occupants. Where for the viability of the project the sale of units required, this shall be strictly only on the basis of a legal agreement specifying that the units shall at all times be utilised only for accommodation for the elderly / those in need of nursing home care;
- Developments comprising of a number of independent dwellings shall comply with the housing layout and design standards set out in this plan. Deviations from the density, car parking and open space may be considered where this can be suitably justified having regard to the needs of the future residents;
- Facilities shall be so laid and designed to meet standards and obligations specified in Nursing Homes (Care and Welfare) Regulations, (1993) and the Building Regulations, in particular Part M.

15.5.5 Care Facilities

- In accordance with the Planning & Development Regulations 2001, change of use from residential to a care facility for more than six persons with an intellectual or physical disability or mental illness requires planning permission.
- Applications for permission for change of use to care facility or a new care facility shall be evaluated against the following criteria:
  - care facilities shall be located close to local amenities and where adequate pedestrian infrastructure has been or is capable of being provided;
  - adequate provision shall be made for car parking and open space facilities.

15.5.6 Accessibility

- In considering access for those with a disability, the Council will adhere to the criteria set out in the Building Regulations, 1997, (or as subsequently amended), and the documents “Access for the Disabled” (Nos. 1 to 3) published by the National Rehabilitation Board;
- New dwellings should be designed in order to ensure that they are visitable and accessible by people with disabilities or mobility impairments. Design considerations shall include:-
  - The provision of a level gently sloped or ramp approach access to the dwelling from the entrance point to the site or from a suitable parking spot.
  - A level access at one entry point to the dwelling.
  - A front door and living room door wide enough to accommodate a wheelchair.
  - Circulation space for a wheelchair at entry storey.
  - A ground floor toilet located so as to be usable by wheelchair users and other people with disabilities or mobility impairments.
15.5.7 Open Space

These standards will apply to all new residential developments and should be read in conjunction with Chapters 5 and 6 of this plan.

Active open spaces
- In accordance with the Council’s Active Open Space Policy, active open space shall be required as a rate of 2.4ha per 1,000 population divided into
  - 1.6ha outdoor play space (pitches, courts, sports grounds)
  - 0.6ha casual play spaces (parks)
  - 0.2ha equipped play space (playgrounds and MUGAs)

Normally, public AOS in accordance with this standard will be zoned through the local area and town plan process and individual development will be required to either deliver some or all of the space required (through an action area agreement) or via development levies. However, where such provision has not been made in a local plan, any application or Action Area Plan would result in a resident population of 1,000 or more, compliance with this standard will be required.

Sports grounds
- New organised sports areas shall be located in proximity to existing or planned community or neighbourhood facilities such as neighbourhood retail centres, schools etc and opportunities for the sharing of facilities, including changing rooms shall be explored and exploited;
- Where shared indoor facilities are not available, new sports facilities shall be accompanied by a building of scale commensurate with the size and nature of the sports facility for indoor changing and administration;
- Sports areas should be located such that a suitable separation from residential properties is provided, in order to limit disturbance from noise and light;
- Sports facilities shall be provided with access to suitable roads and car parking facilities shall be required on site;
- Proposals for the development floodlighting for playing fields/pitches shall be accompanied by details of external lighting schemes. All lighting shall comply or be so altered to comply with the Guidance Notes for the Reduction of Light Pollution (Institute of Lighting Engineers, 2000).

Neighbourhood Parks
- Neighbourhood parks should be ideally located within 800 metres of the population served;
- While not specifically for the purpose of sport or organised recreation, all parks shall be so laid out, contoured and landscaped to allow for walking, jogging, cycling and casual play;
- Neighbourhood parks may be provided as part of a number of housing developments, in part delivery of residential open space requirements (see below).

Equipped play spaces
- The siting and location of playgrounds / mixed use games areas (MUGAs) shall take account of the surrounding environment and be sited in order to ensure passive surveillance by neighbouring residential properties;
- The layout and positioning of apparatus shall exploit existing landscape features to provide adequate shade and shelter from wind for users and create visual harmony with the surrounding area;
- Play equipment shall generally be located in accordance with the following standards
  - 10 metres from the edge of a building or major structure;
  - 20 metres from adjoining residential property lines, the edge of any local road or car park pavement area.
  - 30 metres from distributor road pavements (if proposed to be closer, a perimeter fence will be required)
  - 20 metres from hazards such storm water drains, bike tracks and playing fields.
Allotments

Proposals for the development of allotments shall be evaluated against the following criteria:

- the suitability of the site location vis-à-vis the location of the population served – sites in or at the edge of the settlements will be preferred
- the adequacy of the public road serving the site
- the adequacy of car parking
- the adequacy of water supplies
- the suitability of the land to absorb the somewhat haphazard appearance of allotments, which often include randomly positioned sheds, tunnels and greenhouses

Residential public open space

Public open space in residential developments shall be provided in accordance with the following standards:

- Public open space will normally be required at a rate of 15% of the site area – areas within the site that are not suitable for development or for recreational use must be excluded before the calculation is made;
- Where a public park is being provided by the same developer (or by a group of developers in a combined Action Area) in close proximity to the residential development site, the public open space provided on site may be reduced to 7.5% of the residential site area, with the remainder being made up in the park;
- The need to provide public open space in town centre developments may be waived, particularly where public amenity space such as a town park or beach is in close proximity;
- Open spaces shall be attractively landscaped through the use of both hard and soft landscaping where appropriate. Open spaces should incorporate existing features and encourage pedestrian use by suitable paving;
- In greenfield developments, subject to the size of the site, a hierarchy of open spaces shall be provided to provide for the different play needs of different age groups. In this regard, all developments shall aim to include
  - at least one, flat space with dimensions on not less than 20m x 40m, suitable for ball games (trees should only to planted around the perimeter)
  - a number of smaller spaces immediately adjacent to dwellings, with interesting contours and natural features, suitable for play activities of younger children.
- The layout and orientation of residential developments should maximize the potential for passive surveillance of open spaces - all efforts shall be taken to ensure that all houses are in visual range of one open area.

Private open spaces - gardens, terraces, balconies

- All residential units shall be provided with private open space, either in the form of private balconies, terraces or rear / side gardens. Where necessary to make up for shortfall in genuinely private space, communal private space, for example, in the form of internal courtyards or roof gardens, shall be provided. Care shall be taken to ensure such spaces receive adequate sunlight and meet the highest safety standards;
- All apartments shall be provided with a minimum area of 30sqm private open space, which shall be at least partially made up of a private balcony or terrace. The minimum balcony / terrace sizes shall be:

<table>
<thead>
<tr>
<th>Apartment size</th>
<th>Minimum balcony / terrace size</th>
</tr>
</thead>
<tbody>
<tr>
<td>One bedroom</td>
<td>5sqm</td>
</tr>
<tr>
<td>Two bedrooms</td>
<td>7sqm</td>
</tr>
<tr>
<td>Three bedrooms</td>
<td>9sqm</td>
</tr>
</tbody>
</table>
- Dwellings (including own door duplexes) shall be provided with private open space at a rate of 0.64sqm per 1sqm house floor area, with the minimum garden size allowable being 48sqm;
- In certain development circumstances, the open space requirements, as set out above are not appropriate to special housing needs categories, including the special needs requirements of certain social and affordable housing categories, such as the elderly and disabled. The open space requirements to be provided for certain special needs housing developments, (including
social and affordable housing) shall have regard and be appropriate to, the special needs of those to be accommodated in any development.

**Landscaping**

Tree planting can be used to complement hard-landscapes in high-density / urban developments and reinforce and enhance existing natural features and integrate development with surrounding landscape. A landscaping plan shall be designed as an integral part of all new residential estates and shall be submitted with the planning application. This plan shall highlight existing landscape features to be retained and detail new landscaping including species, number, size and location. The plan should put an emphasis on the use of native species where possible.
