Infrastructure - Sustainable Movement – Transportation

Submission

The movement of traffic through and in and out of Bray, is and has been a very difficult experience at off peak times, and a nightmare most of the time. Bray is the biggest town in Wicklow with a current population of over 32, 000. When all the new developments in and around Bray are up and running this number will greatly rise. There is no infrastructure, no extra schools and no allowance for the extra traffic these developments will incur. Bray had been penalised by moving the Co.Co.Council to Wicklow.

Bray has been neglected by successive Council representatives on the problem of "Traffic".

Bray can not sustain the lack of a traffic plan. It would be in the interest of the voters who put the councillors in position to do something constructive about the dreadful traffic congestion through Bray.

It is not hard to see how a bus service in Bray could not keep to a timeline, why? because buses can not get through the congestion in Bray. There will never be a switch to public transport. A sensible "Traffic Plan" for Bray is now URGENT.

JULIA..
