Topic

Compact Growth - Housing – Population Growth

Submission

Loads of vacant shops in Main Street all with living accommodation above. Perhaps owners could be encouraged to develop the overhead accommodation for apts with grants or tax incentives to bring them up to a high energy rating standard and suitable modern day living. This would entice people back into the Main Street as well to shop locally.

From the car park in the Main Street up to the courthouse is ripe for development. The buildings are derelict and fire damaged. The Council should make the owners develop their property or council put a CPO on it.
