1. Lighting in the town in general is very dull, having lighting on one side of the road and restricted by trees, hedges or lorries results in several dark areas even on the main street
2. Why the secrecy in putting up pencils/bollards at schools – road markings were done in middle of night?
3. Roundabout at graveyard/ woodlands is a necessary
4. Widened paths at church going up St. Marys road is an accident waiting to happen – many a near miss where cars need to pull out across the road to turn up the street
5. Bridgewater congestion at the bridge roundabout – why cant north facing traffic use the new road up Seaview Avenue so all traffic is not gridded at the roundabout
6. Crossing at Christies not viable for car users – people walk out behind cars giving no regard for car users trying to come around the corner and watch traffic – another accident waiting to happen
7. How long does it take to put down footpaths on both sides of the town – the work out at Hills Garage took an age and the one out Kish Road it taking longer. They have narrowed the road to give bike lanes which is ok, but the bike lanes stop at a certain point which means they then come out onto the road with no regard for traffic on the main road
