Topic

LAP - Proposed Material Amendments No 26 Submission

Submission

I strongly condone the consideration being given to the re zoning of lands on Bellevue Hill, firstly, this area has been over developed in the context of local infrastructure including roads but of equal importance, the hugely damaging impact said action would have on our local bio diversity, we hear lots of comments and commitments being made with respect to this but action speaks louder than words and I ask that the local authorities come up with a holistic plan opposed to development opposed to the slap dash nature over the last number of years, an example being the development of the Farrenkelly Bi Pass - why develop something like this if you are not going to double down on development in and around it, it is critically important that we respect our countryside and protect bio diversity, not to mention protect heritage.
