Criteria for inclusion on the map - any submission to exclude or include land should make reference to these criteria:

Land that meets the criteria for inclusion on the map, and therefore liable to the RZLT, is land that –

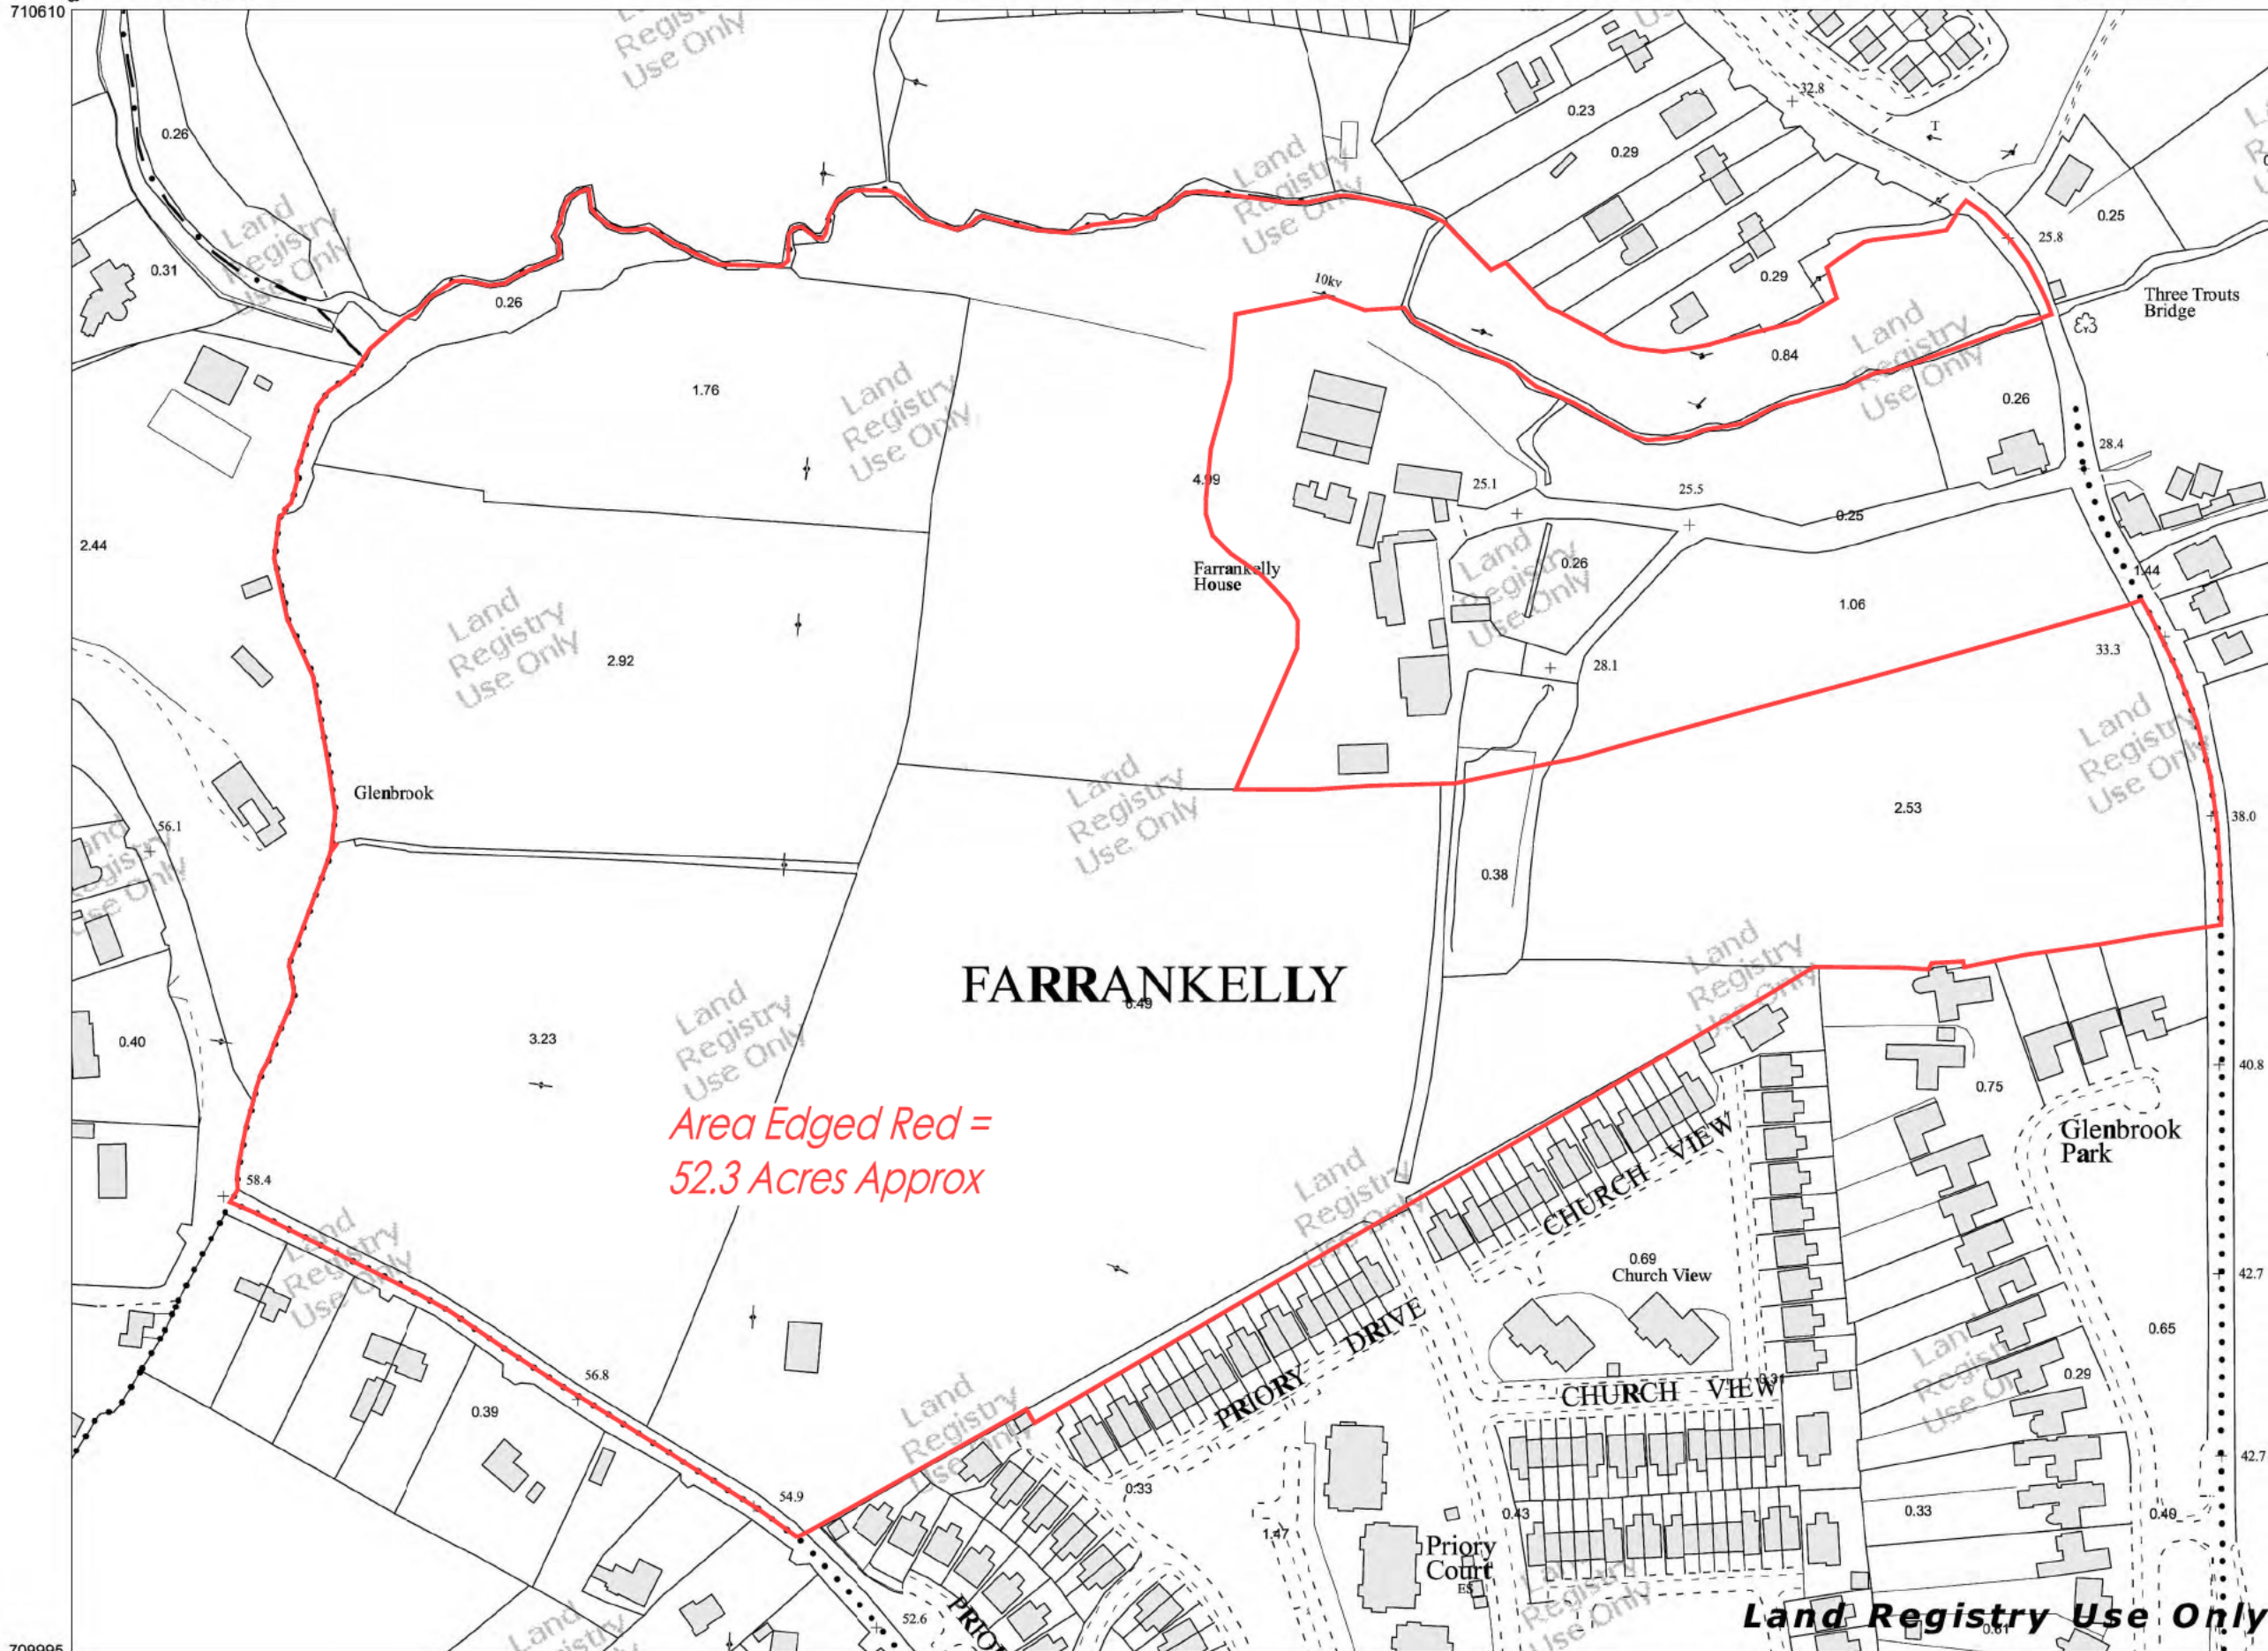

- is included in a development plan or local area plan and is zoned for residential development or zoned for a mixture of uses, that includes residential development.
- is serviced, or it is reasonable to consider may have access to services. Serviced means having access to the necessary public infrastructure and facilities including road and footpath access, public lighting, foul sewer drainage, surface water drainage and water supply necessary for dwellings to be developed and for which there is service capacity available sufficient to enable housing to be developed.
- is not affected in terms of its physical condition, by matters to a sufficient extent to preclude the provision of dwellings, including contamination or the presence of archaeological or historic remains.

but which is not –

- land that, while zoned residential, is an authorised development used to carry on a trade or profession by a business liable to pay commercial rates, and which provides services to residents of adjacent residential areas.
- land that is zoned for a mixed used purpose (including residential) unless it is reasonable to consider that such land is vacant or idle.
- land that is required for, or occupied by, other uses such as social, community or governmental infrastructure, including education and healthcare facilities, facilities used for the purposes of public administration, transport facilities and infrastructure, utilities, energy or telecommunications infrastructure and facilities; water and wastewater infrastructure and facilities, waste management and disposal infrastructure, recreational infrastructure including sports facilities and playgrounds.
- land that is subject to a statutory designation that may preclude development.
- land in respect of which the Derelict Sites Levy is payable.
