## Topic

Rathnew Village Centre Strategy

## Submission

Resident in the new Tinakilly Park area and have been here since the start. The traffic situation at that junction is critically dangerous when entering from Wicklow Town, or when turning from Rathnew direction up the hill.. I don't know another traffic light system in the country like it, where cars have to veer around each other and guess that the oncoming car stream has finished. I know of at least 5 crashes at this junction already, almost certainly many more I have not heard about. Waiting for someone to be killed is far far too late. It needs to be a roundabout, keep traffic flowing like when the electricity is down, you never see queues here. The build up coming from Wicklow town towards Rathnew at peak hours is extensive, and these lights are the main cause of it.
