Infrastructure - Sustainable Movement - Transportation

Submission

The double tracking of the rail line through bray head is the number 1 no brainer re public transport, should have been done before the dart was extended in the 90's.

We need to add a significant number of direct busses to and from the city centre until such time as the rail line is double tracked

The n11 widening scheme needs to be built,.disgrace that the greens can hold back the biggest pinch point in the countries motorway network
