LAP - Proposed Material Amendments No 1 Submission

Submission

As a fresh water supplier to several residences at the top of Bellevue Hill, well above the proposed site for GAA pitches at the lower end of Bellevue Hill. I would be very conscious of where they will access water from for irrigation, construction and general use, although I am aware that there is a public water supply available at the lower levels of the hill.

My concern would be that by installing a well(s) at the lower point on the hill that this would have a negative bearing on the water table and would therefore have a detrimental effect on the current water supply higher up the hill
