**TRAFFIC POLICING    -   Submission on behalf of ABR by Tony Curran**

**Speeding, breaking red lights, driving on footpaths, bicycles and E-scooters on footpaths and general anti social behaviour has become, unfortunately, the norm in the Bray Urban Area.**

**These dangerous and illegal behaviours are indulged in with impunity and account for the majority of pedestrian fatalities.**

**It is generally agreed that policing on the ground is the most effective way to tackle these illegal behaviours. “Boots on the ground” is also the best way of improving community relations.**

**Drivers who indulge in the above bad behaviours should bear in mind that an accident can cause death and serious injury. Please remember that it could be one of your friends and family who is the victim. The sense of sorrow and loss suffered by those left behind is everlasting. Remember it could be you or yours.**
