Community Safety Fund Funding Call 2025 Guidance Notes for Applicants

Introduction

In June 2021 the Department of Justice published a policy paper on Community Safety. This paper, provides an overview of what Community Safety is, how the new approach will make a difference, and how new structures, the Local Community Safety Partnerships (LCSPs), which will replace the current Joint Policing Committees, will operate.

The concept of community safety is about people being safe and feeling safe in their own community. At the heart of this policy is the principle that every community has the right to be and feel safe in order to thrive and flourish.

The Community Safety Policy seeks to ensure that communities are safer and feel safer by making community safety a whole of Government responsibility and priority. [The Policing, Security and Community Safety Act 2024](#) provides for the establishment of a national infrastructure to support the new approach to community safety and places a statutory obligation on Government Departments, local authorities, public bodies and agencies to have regard to harm prevention in their activities, and to cooperate with each other to deliver safer communities.

At the centre of this infrastructure are the Local Community Safety Partnerships (LCSPs) which will operate at each local authority level. The partnership approach to community safety is centred on the principle that responding to the issues of community safety requires a range of inputs from across Government, local services, voluntary sector and importantly the community itself. In practice, this new approach will reposition community safety as the provision of adequate and appropriate social services consistent with local needs.

While State services carry out their individual responsibilities, too often their interventions rely on a reactive response to emergency and crisis situations. The aim of community safety is to focus all relevant Government services on prevention and early interventions, and the impact that a shared approach to problem solving can have in ensuring that situations do not develop to the point where they impact on the safety, or feeling of safety, of the community at large.

This will mean State services working with each other and the community to ensure there is better coordination between services such as educational and youth work with young people, the availability of local health and mental health services, drug prevention, housing and the built environment, and actions taken to combat alcohol and substance abuse, domestic abuse, youth crime, anti-social behaviour, and hate crime.

This policy is supported by the Policing, Security and Community Safety Act 2024 which places a statutory obligation on Government Departments, local authorities, public bodies and agencies to have regard to harm prevention in their activities, and to cooperate with each other to deliver safer communities.

The Community Safety Funding Call 2025 is an important element in achieving the overall objective of the Community Safety Policy. The Fund was launched on Monday the 7th of April 2025 by Minister O’Callaghan.

The Community Safety Fund:

- Allows proceeds of crime to be directed into community projects to support community safety
- Ensures that the most appropriate proposals to improve community safety will receive the funding they require
- Encourages the development proposals to improve community safety from those people who best understand local community safety needs
- Allows best practice on community safety and youth justice to be shared with other partnerships and communities nationally as new proposals are developed
- Reflects and highlights the success of An Garda Síochána and the Criminal Assets Bureau in seizing the proceeds from criminal activity
