Submission

The reduction in town centre parking is very worrring for local businesses, whilie I understand public realm is not all about parking it needs further addressing. recently there was a reduction in parking to allow for disability parking, electric parking and expansion of the market square area. While I welcome the idea there is curently people parking in the village and leaving for the day on the bus, this is crippling local small businesses. There needs to be a parking masterplan in place before we can lose more spaces. Pay parking is an option which needs to be considered
