Submission to Variation No.6 of the Wicklow CDP 2022-2028

Thank you for asking for submissions on the Proposed Variation (No.6), to the County Wicklow County Development Plan. I would like to make the following submission.

Introduction

Our community supports sustainable housing, as is testified by the number of developments completed and in progress to date, in and around Enniskerry Village, however the risks of further overdevelopment that the adoption of the proposed variation No.6 will cause, is to further damage the fabric of the village including the community life using the village.

The proposed changing Enniskerry status to a 'Key Town / Large Town or Small / Medium Town Centre', along with increased densities of over 100% according to the Table 6.1 in the Proposal, are of deep concern.

My observations are as follows:-

The published Proposal for Variation No.6

- 1) The explanation for calculation of these huge increases in density relating to Enniskerry is not given.
- 2) Our village is being classified as a Large Town compared to Roundwood which has far more facilities including a village store. It is classified as a 'Small Medium Town edge' with density per hectare of 25 to 40. It would be useful for our community to understand why this is.

Impact to Enniskerry Village:

- 1) The densities proposed require High-Capacity Public Transport. Enniskerry is served only by low-frequency (hourly) bus routes.
- 2) The village has no rail or DART link. The high densities noted in the proposed variation will further increase the traffic gridlock on the R117 and R760, creating a public safety risk for emergency vehicle access.

- 3) Increasing density by 2 to 5 times without a costed plan for a proper sustainable infrastructure for transport result in an unsustainable surge in traffic contradicting the Wicklow County Councils Climate Action Plan 2024.

Impact to Knocksink Woods SAC.

It is inconceivable in the environmental assessments supporting the Proposed Variation that higher densities will not significantly or otherwise negatively impact the Tufa Spring regime, (protected under EU Habitats Directive and Irish Law,) in Knocksink Woods, Special Area of Conservation (SAC). The evidence and concerns provided by independent experts and NPWS have clearly stated to the contrary.

I ask that the proposed Variation No. 6 be amended to:

- Align Enniskerry to no greater than Small Medium Town in Table 6.1.
- Maximum density cap of 20-25 units per hectare.
- Revisit the environmental Appropriate Assessment for Knocksink Woods and reflect the view of the National Parks and Wildlife Service in their previous submissions in relation to planning matters at AA2 lands, Parknasillogue. (Ref. (Department Submission dated 10 March, 2022 to An Bord Pleanála).

Kind regards,

Caroline O'Callaghan
