Land Use Zoning / Specific Local Objectives / Land Use Zoning Map

### Submission

I [REDACTED] object to Bless OP7 which proposes "vehicular access...through incidental green space in Lakeside Downs". Such access would significantly increase traffic into our cul-de-sac where we have mixed ages of property owners and occupiers including elderly and children.

Despite signs that are currently at the entrance to Lakeside Downs, people ignore them and we are already subject to a significant number of non-resident vehicles driving in and using the space to turn their vehicles outside my house throughout the day and night, some of which drive at unacceptable speeds for a residential community.

As a member of our Residents Association, I should point out that the "incidental green space" is owned by the Residents and we would not be in favour of providing permission for such access if requested.

I therefore submit a formal objection to this proposed option.

Kind regards. Ciara McLaughlin. [REDACTED]
